

Software Engineer Intern

Chalandri, Attica-Greece, tel. 2110121880 - careers@logicea.com

Who we are

Logicea is a provider of software development services and data solutions, helping its clients leverage big data, cloud and mobile technologies, experience design, along with DevOps practices to achieve strategic, operational and IT objectives. Based in Washington D.C. with the development center in Athens, Greece, Logicea operates around the world, with presence in Dubai and Singapore.

We're currently seeking young students who are passionate about innovating, impacting their experience, interested in learning to be part of our team. If you're looking for an exciting and challenging role in a dynamic environment, then we would like to meet you. Take this opportunity to get familiar with Logicea space and people.

We love technology and the people who are passionate about it!

During your journey you will...

- Be member of an agile team and work with business domain experts to acquire your very first job experience. You'll find out what digital transformation is all about...
- Have the chance to write and view JVM based (Java / Kotlin) code for backend systems that drive web and mobile applications
- Have the chance to write and view code for Single Page Applications (SPA) using the ReactJS framework
- Develop hands on experience with data processing. Don't care if data is coming in batches or in streams. Solutions are around the corner...
- Discover the meaning of Software Version Control, Continuous Delivery and Project Methodology. It's nice to work with others...
- Associate with the rare species of Designers and DevOps Engineers. They are around to help you...

You don't need to have much but the following are a good start...

- Studies in Computer Engineering/Information Technology or any other relevant field
- Excellent written and verbal communication skills in Greek and English
- Strong interest in software technology and new programming paradigms (Java, Kotlin and Javascript are fine)
- Analytical and methodical approach with attention to detail
- High learning agility and continuous improvement mindset
- Team player spirit and good interpersonal skills
