

Software Engineer

Job Description

i2s is a high-tech company with a global presence for more than 20 years, specialized in the area of software technology, IoT systems and Machine Learning Solutions.

We're looking for an enthusiast, detail-oriented individual to join our team and work in a friendly environment. This is an opportunity to apply your cross-functional skill sets, creativity and experience in **computer vision** and **machine learning** to solve exciting product development challenges.

Skills & Experience

- Very strong problem analysis and solving skills
- Curiosity and willingness to learn new technologies
- Fluency in Python
- Experience in Computer vision, using libraries such as OpenCV, Dlib, etc.
- Experience in machine learning algorithms for vision problems, including deep learning (using libraries such as TensorFlow, or PyTorch) is highly desired
