Network Engineer Intern

Athens Exchange Group (ATHEX Group) is currently looking for a self-motivated **Network Engineer Intern** with passion for Technology to join a group of highly skilled IT professionals in the IT Infrastructure Department.

More precisely, the intern will participate in:

- Troubleshooting, diagnosing, and resolving hardware, software, and other network and system problems.
- Designing, configuring, and testing networking software, computer hardware, and operating system software
- Updating data servers and network equipment.
- Performing disaster recovery operations and data backups when required.
- Protecting data, software, and hardware by coordinating, planning, and implementing network security measures.
- Replacing faulty network hardware components when required.
- Maintaining, configuring, and monitoring virus protection software and email applications.

The ideal candidate should hold the following **qualifications**:

- Undergraduate student in Computer Science, Computer Engineering or relevant filed
- Understanding of network infrastructure and network hardware.
- Ability to implement, administer, and troubleshoot network infrastructure devices, including wireless access points, firewall, routers, switches, controllers.
- Good analytical and problem-solving skills.
- Experience in the installation and maintenance of Linux and Windows Systems is a plus
- Familiarity with Python, Perl, or other scripting languages.
- Strong interpersonal skills and ability to work as a team player in a fast-paced environment.
- Very good skills in MS Office
