

Full Stack Developer

American Bureau of Shipping (ABS)

About the job

Job Description

Responsible for designing, building, and developing corporate applications along with the rest of the development team. The developer will work in all aspects of building and supporting corporate applications.

What You Will Do

Design, build and develop corporate applications along with the rest of the team.

- Actively participate in the entire application lifecycle, focusing on backend and frontend coding and debugging
- Developing and supporting the existing applications, adding new features, according to the business needs
- Use solid coding skills used in individual contribution and code reviews of other team members.
- Troubleshoot issues quickly in support of hotfix demands as well as operate against a planned development schedule.
- Proposing solutions to technical issues that occur
- Keeping on top of new technologies
- Designing and developing APIs

Must have good communication skills, an appreciation for systems lifecycle methodologies and a commitment to process adherence for you will be asked to:

- Manage your work to agree upon goals and objectives, including schedules and milestones.
- Contribute to process improvement initiatives and lead by example to meet schedule and scope commitments.
- Collaborate with quality assurance team members to structure test scenarios and plans.
- Operate in an agile scrum style with a mindset toward creating workable interim deliverables that can be demonstrated to clients and product managers.

What You Will Need

Education and Experience

- Bachelor's degree in computer science or equivalent experience preferred.
- 3 plus years of experience as backend/full stack developer

Knowledge, Skills, And Abilities

- 3-5 years working experience in web-based applications using.
 - Python, Node.js, PHP or other language
 - HTML5 and CSS3
 - Typescript/JavaScript
 - Relational database systems such as PostgreSQL and/or MySQL
 - SOAP and REST web services
 - Git version control
- Knowledge or previous experience in front-end frameworks/libraries such as Angular/React/Vue will be considered a plus.

About Us

We set out more than 160 years ago to promote the security of life and property at sea and preserve the natural environment. Today, we remain true to our mission and continue to support organizations facing a rapidly evolving seascape of challenging regulations and new technologies. Through it all, we are anchored by a vision and mission that help our clients find clarity in uncertain times.

ABS is a global leader in marine and offshore classification and other innovative safety, quality, and environmental services. We're at the forefront of supporting the global energy transition at sea, the application of remote and autonomous marine systems, cutting-edge technical solutions, and many more exciting advancements. Our commitment to safety, reliability, and efficiency is ever-present, guiding our clients to safer and more efficient operations.

Equal Opportunity

ABS Bureau is committed to the equal employment opportunity of its employees and prohibits discrimination against any employee or qualified applicant based on race, color, creed, religion, national origin, sex, gender identity, age, disability, marital status, sexual orientation, citizenship status or veteran status, or other non-work-related characteristics that may be protected under the law of the Federal Government or specific state employment laws.

Notice

ABS and Affiliated Companies (ABS) will not pay a fee to any third-party agency without a valid ABS Master Service Agreement (MSA) authorized and signed by Human Resources. Any resume, CV, application, or other forms of candidate submission provided to any employee of ABS without a valid MSA on file will be considered property of ABS, and no fee will be paid.
