

Company Profile

AMPLUS Technologies is a pioneering and innovative IT Company that implements high quality projects in Financial Institutions, Telecommunication Companies, Insurance Organizations, Educational Institutions, and organizations of the wider Public and Private Sector. In the decade of 2000's, AMPLUS Technologies has managed to possess a major market share of the IT Solutions industry. Established by a team of IT specialists, the company has a stable and upward evolution throughout these years.

In AMPLUS Technologies, we constantly offer integrate and end to end solutions which increase the quality of the services provided and strengthen the loyalty of our clients through a client-driven approach.

Due to the continuous growth of our company, we are currently looking for a **Medior Network Engineer** to join our team.

Job Summary

The job holder will be responsible for designing, implementing, and maintaining the organization's network infrastructure. He/ She will be involved in collaboration with cross-functional teams to ensure the network meets the company's needs for reliability, security, and performance. To be successful in this role, he/she will lead network projects, troubleshoot complex issues, and provide guidance to junior team members.

Responsibilities

- Design, implement, and maintain enterprise-level network infrastructure, including routers, switches, firewalls, and wireless access points.
- Develop network architecture plans and strategies to support business objectives and growth.
- Lead network projects, including network upgrades, migrations, and expansions.
- Configure and optimize network equipment for performance, reliability, and security.
- Monitor network performance and troubleshoot network issues, including packet loss, latency, and bandwidth constraints.
- Implement and maintain network security measures, including firewalls, VPNs, and intrusion detection/prevention systems.
- Collaborate with other IT teams to integrate network solutions with existing systems and applications.
- Provide technical guidance and mentorship to junior network engineers and technicians.
- Document network configurations, changes, and troubleshooting procedures.

Qualifications

- Bachelor's degree in computer science, information technology, or a related field.
- Master's degree will be considered as an asset.
- Minimum 3 years of experience in a related field.
- Excellent command of MS-Office.
- Professional certifications such as CCNA/CCNP, or equivalent industry certifications preferred.
- Expertise in designing and implementing complex network architectures, including LAN, WAN, and data center networks.
- In-depth knowledge of networking protocols and technologies, including TCP/IP, BGP, OSPF, VLANs, and QoS.
- Strong problem-solving and analytical skills.
- Exceptional communication skills to collaborate effectively with team members.
- Strong multi-tasking and organizational skills, ability to work under tight deadlines.

Benefits

- Competitive salary
- Great Place to Work Certified Company
- A mentor to support you with your employee experience
- Monthly Meal coupons
- Continuous learning and development opportunities in IT industry
- Modern, stable, and challenging work environment
- Diverse and inclusive culture
