

**Job Title:** 6G Junior Researcher

**Company:** Lenovo Research / 5G-6G team

**Duration:** 36 months (with potential for long-term extension)

**Position Overview:**

We are looking for 6G Junior Researchers to join our team in Athens, Greece, and engage in groundbreaking innovation projects. As part of this role, you will work on EU research projects, collaborate with industry leaders, and stay updated with the latest 6G standards advancements in bodies like 3GPP, ETSI, and IETF.

**Candidates should possess**

- An advanced degree in mobile communications (or be pursuing one, e.g., MSc or PhD)
- Good knowledge of 5G architecture
- Experience in cloud computing, AI, and related technologies
- Strong problem-solving abilities and a proactive approach
- Previous involvement in EU research projects is advantageous
- Outstanding English communication skills

**Why Join Us?**

- Be a frontrunner in wireless communication research
- Contribute to impactful research projects
- Enhance your skills in a dynamic, research-oriented environment
- Specialize in future mobile communication networks
- Enjoy highly competitive benefits

**Application Process:**

All interested candidates are requested to forward their CVs to [y1026c@lenovo.com](mailto:y1026c@lenovo.com).
